G	show grid	show control points	show CP numbers	toggle centre of gravity
H	highlight next	highlight previous	remove highlighting	auto-highlight
I	increment more	increment less	reset increment to 1	insert frame
J	jump to a frame	same		
K	slow synched anim'n	med. synched anim'n	fast synched anim'n	animate continuously
L	links view	same	read/show links file	load next file above
M	toggle animate mode	same	reset animate mode	load next file beside
N	show marker numbers	show marker names	add notation to frame	load next file
O	display origin	display origin axes		toggle display of ref' points
P	toggle point view	same		
Q	quit	same		
R	replot	replot	renumber frames	reload
S	step mode	same	(not usable)	edit scaling data
T	trajectory view	same		
U	undo	same		alternate help display
V				average adjacent frames
W	write (save) data	same	allow writing to file	
X	digitizing mode	same		reverse X-direction
Y	initial colour next	initial colour prev.	reset initial colour	alternating colours
Z	single colour next	single colour prev.	reset multicolour	suppress (0,0) coordinates
+ or =	increase zoom			
-	decrease zoom to 75%			
_	zoom out to 50%			
/ or ?	show authors			
0	draw axes at (0,0)			set animation mode to 0
#	show marker numbers			
@	show marker names			
F1	toggle help menu		reset help menu	show file title
F2	animate continuously		reset animation	reset all defaults
F3	increase anim. speed		reset anim. speed	fastest anim. speed
F4	decrease anim. speed		reset anim. speed	
F5	print		print	
F6	toggle dashed/solid lines			
F7	increase force vectors		reset force vectors	
F8	decrease force vectors		reset force vectors	
F9	increase frame increment		reset frame increment	
F10	decrease frame increment		reset frame increment	
F11	increase zoom		reset zoom	
F12	decrease zoom		reset zoom	
Home	go to first frame	same	recentre images	
End	go to last frame	same		
Enter	centre on mouse			
Space	remove frame number
